

Let's join hands to save the planet

## Company Profile

[www.justsolenursery.com](http://www.justsolenursery.com)

## Company Over View

---

Just solve nursery was incepted in the India in 2017, our core business activities are the supply and maintenance of indoor and outdoor plants, landscape design, estimation and maintenance and general irrigation works

We are the main plant maintenance contractor to many prestigious government institutions, banks, hotels, offices, and residential properties. All of our plants are put through an internal quality assurance (QA) test, prior to delivery to our customers.

Our design philosophy is to provide a healthy, comfortable, beautiful and sustainable environment. Our work is inspired by unique customer - driven designs that are not only beautiful but also efficient. We give priority to the use of natural resources, owing to their ingrained depth and enduring qualities.

Landscaping is both a science and an art, and requires good observation and design skills. Just solve nursery understands the elements of nature and construction and blends them accordingly.

We are a company totally dedicated to environmental ethos, and shall ensure the continuation of a safe, clean and healthy ecosystem. We also have solid business processes that are geared towards a greener environment.

## Plant Herb to Save Bees

These common herbs are among some of the best plants in providing bees with valuable nectar and pollen throughout the year.

# To Help Save Bees

**BORAGE**

**CILANTRO**

**FENNEL**

**LAVENDER**

**CATMINT**

**THYME**

**SAGE**

## Plant Perennials to Save Bees

Flowers are an asset to every garden. They're pretty, yes. But planting flowers serves another purpose: They attract bees and other pollinators to your garden. Flowers that attract bees and other pollinators are a great addition to the home garden. They attract the good guys, they'll be a food source for pollinators for years.

# To Help Save Bees

**SNOWDROP**

**ASTER**

**ANEMONE**

**CROCUS**

**HOLLYHOCK**

**GERANIUM**

**BUTTERCUP**

## Plant Annuals to Save Bees

More and more gardeners are anxious to plant a bee garden. By planting a bee garden, you too can do your part to help the bees by adding to the shrinking inventory of flower-rich habitat in your area. In return, the bees will pollinate your flowers, providing a bountiful harvest of fruits, seeds and vegetables as well as the joy of watching them up close.

## Our Contribution Towards A Greener Environment

---

Our entire operations deal with the provision and maintenance of plants which directly impact the environment. We will assist our customers in choosing the right indoor/outdoor plants and the corresponding planters. All our products come from suppliers who are committed to environmental safety.

There is a greater need for human beings to take care of the environment especially plants. We have the responsibilities to ensure that our earth is environmentally healthy for our next generations and also for the entire ecosystem. Plants play a crucial role in this aspect whether they are indoor or outdoor. Some of the benefits are highlighted below:

- Plants capture and eliminate dust particles from the air.
- Plants capture and eliminate toxic substances from the air and also release oxygen and eliminate carbon dioxide.
- Plants regulate humidity of their surroundings, this is vital, considering the massive use of air-conditioning in “sealed buildings”.
- Plants in buildings create environmental awareness to our customers and the general public.

From the global point of view, earth can be considered as a living being, (Gaia theory, Lovelock).

The plants are its lungs as they release oxygen and eliminate CO<sub>2</sub>, if this would not occur the animal's life process would exhaust oxygen and life on earth would not be possible. Each plant, whether in exterior or interior surroundings creates a micro climate around itself, and thanks to its transpiration, contributes to the humidity regulations of its surrounding.

Human beings and plants need each other. Why then should we not take care of plants in the right way?

# Choosing the Right Outdoor Plants

There are many factors to consider when choosing the right outdoor plants for a garden or landscape setting. Beyond simple preferences in height, breadth, growing season, fragrance in blossoms, ease of care, uniqueness, and variety, there are considerations of soil conditions, temperature, access to light, potential for pests and disease, ability to complement rather than compete with garden neighbour.

**Roystonea Regia**

**Hardy Bamboo**

**Cycas Revoluta**

**Mascarena Palm**

**Chamaedorea Elegans**

**Zamia Furfuracea**

**Bottle Palm with Trunk**

**Areca Palm**

**Table Palm**

# Choosing the Right Indoor Plants

A houseplant is a plant that is grown indoors in places such as residences and offices. Houseplants are commonly grown for decorative purposes, but studies have also shown them to have positive psychological effects. Houseplants also help with indoor air purification. Some species, and the soil-dwelling microbes associated with them, reduce indoor air pollution by absorbing volatile organic compounds including benzene, formaldehyde, and trichloroethylene. While generally toxic to humans, such pollutants are absorbed by the plant and its soil-dwelling microbes without harm. Common houseplants are usually tropical or semi-tropical epiphyte, succulents or cacti. Houseplants need the correct moisture, light levels, soil mixture, temperature, and humidity. As well, houseplants need the proper fertilizer and correct-sized pots.

**Peperomia Rubella**

**Sedum Rubrotinctum**

**Sansevieria Trifasciata**

**Peperomia Orba**

**Peperomia Obtusifolia**

**Pachyveria Bea**
